PROMETHEUS WEEKLY PROGRESS REPORT

WEEK OF APRIL 10th 2017

Good evening welcome to the first Prometheus weekly progress report. This week we worked on mainly internal affairs within our small start-up. Here are some of the highlights.

Third Annual Rev Hardware Summer Program

The Prometheus team has decided to participate in the REV Hardware Summer Program to better advance our breakthrough technology and create a truly revolutionary product. The program offers state of the art labs to work in as well as multiple experts in multiple fields to help develop the product. Alongside product development the program assists with the business side of a start-up such as market research, design, branding, infrastructure. Read more about it at this link.

EXPANDED OUR TEAM SIZE

Our current team consists of 7 dedicated members bringing a variety of skills from business development to software development. All members are part of the Cornell College of Engineering Class of 2020.

Jean Turban: CEO

Leul Tesfaye: CTO

Shadman Khan: CFO

Nicolas Buitrago: Lead Software Developer

Mark Hussey: Co-Lead Hardware Developer

Juan Garcia: Co-Lead Hardware Developer

Clara Walton: Lead Market Research

CONDUCTED HEAVY MARKET RESEARCH

As part of this week's work the team has compiled over 50 softwares and professions to go along with them that could potentially become our markets. Over the next couple of weeks the team while conduct heavy research into each one to determine which is the best one.

OTHER UPDATES

- Finalized our logo design's
- Begun conducting experiments to test efficiency of competitor products
